QUALITY POLICY STATEMENT

Australian Foundation Drilling and Shoring Pty Ltd offers a broad range of drilling and ground engineering solutions to various construction sectors including the civil, building, petroleum and mining industries.

The company's corporate objective is to provide engineering excellence through a process of continuous improvement and implementation of quality systems.

To achieve this, AFDS maintains an effective Quality Management System based on the requirements of AS/NZS ISO9001:2000.

The Quality Management System outlined in the company's quality manual and procedures has been designed to control the work performed and confirm the effectiveness of all AFDS operations with regard to meeting service quality obligations to our clients.

The key strategies for the effective implementation of the quality system include periodic management reviews for suitability, effectiveness and improvement which include review of company policy, goals and objectives.

This policy will be communicated to all employees whose responsibility it is to ensure adherence to the principles and guidelines of AFDS's Quality Management System.
